THE PROBLEM

Content creators were spending hours manually clipping long-form videos into short-form content, writing captions, and uploading to social platforms one by one. This bottleneck prevented consistent posting schedules and rapid audience growth.

HOW IT WORKS

OUTPUT DELIVERED

Auto-clipped Shorts

Generated Captions

Hashtag Sets

Published to Social

Scheduled Posts

A single long-form video now automatically becomes multiple publish-ready Shorts with captions and hashtags, distributed across platforms without a single manual step. Content teams 10x their output without increasing headcount.
